AI Development | Networking, Security & Scalable Systems | Software Development

EDUCATION

Medi-Caps University,
Indore, Madhya Pradesh
B.Tech in Computer Science
Graduation: May 2026

PROFESSIONAL SUMMARY

Results-driven AI Engineer with expertise in Agentic AI, Generative AI, Machine Learning, and scalable AI-powered applications. Skilled in building intelligent systems using LLMs, RAG, FastAPI/Flask, deep learning frameworks, and cloud technologies. Experienced in developing production-ready AI solutions integrating automation workflows, REST APIs, and intelligent AI agents. Strong foundation in software engineering, cybersecurity, networking, and data-driven system optimization.

SKILLS

Programming Languages: Python, C++, SQL.

AI/ML Frameworks: TensorFlow, PyTorch, scikit-learn, XGBoost, LangChain & Graph Agentic AI, Generative AI, Keras, Transformer Models, (RAG), CI/CD Concepts for ML.

Python & Backend Development: FastAPI, Flask, REST APIs, Secure API Design, Object-Oriented Programming (OOP), Functional Programming

Developer Tools: DSA, Jenkins, Git, GitHub, PowerBI, Docker, Postman, VS Code, Jupyter Notebook.

Networking: TCP/IP, DNS, DHCP, VLANs, Routing Protocols.

Soft Skills: Problem Solving, Team Collaboration, Agile/Scrum Methodologies, Technical Documentation, Prompt Engineering, SDLC.

ACHIEVEMENTS

Completed 7+ industry-recognized certifications in AI/ML, cloud computing, networking, and cybersecurity.

Completed the [McKinsey Forward Learning](#) Program, developing strong problem-solving, leadership, and digital capability skills.

Applied agile methodologies and version control in all academic and personal projects.

[Earned multiple IBM Z-Days](#) professional badges in AI, data, and cloud-native technologies.

Lead team multiple times in different projects during my academic years.

PROFESSIONAL EXPERIENCE

AI & ML Engineer Nov 2025 – June 2026
Incrivelsft Private Limited

- Engineered **10+ production-grade AI agent automations** across diverse business use cases, designing specialized workflows for task-specific reasoning, decision-making, and execution.
- Applied prompt engineering and model/retrieval optimization, improving prediction consistency by **20–30%** and reducing irrelevant outputs by **~25%**.
- Built production-grade RAG pipelines for individual agents with retrieval, reranking, query optimization, and Graph RAG for context-aware and multi-hop reasoning.

PROJECTS

AI Hospitality Multimodal & Multi-Agent AI System - [Link](#) Jan – Mar 2026

- Developed an AI-powered hospitality and travel experience platform integrating 5+ intelligent AI agents and Generative AI workflows to automate itinerary planning, hotel recommendations, and personalized travel assistance.
- Processed and optimized dynamic travel inputs including destination, duration, budget, and interests to generate personalized recommendations with reduced manual planning efforts by 95%.

AI-Powered Career Advisor - [Link](#) Jan – Jun2025

- Architected comprehensive AI-driven career readiness platform using MERN stack with personalized career guidance, skill development, and job market connections.
- Developed **Career Guidance Chatbot** providing personalized advice on job roles, industry trends, and skill requirements based on user profiles and career aspirations.
- Implemented **Interview Prep AI** conducting realistic mock interviews with real-time feedback, answer evaluation, and improvement suggestions achieving 85% user preparedness improvement

Intrusion Detection System (IDS) with Machine Learning - [Link](#) June – Oct 2025

- Building intelligent network intrusion detection system analysing traffic patterns to identify cyber threats in real-time with 94% detection accuracy
- Pre-processed and analysed CICIDS2017 dataset containing 125,000+ network traffic records using feature engineering and dimensionality reduction
- Reduced false positive rate by 35% through hyperparameter tuning and cross-validation techniques

CERTIFICATIONS

- [Deep Learning Essentials](#) and [AI Fundamentals](#) | IBM | 2025
- [CCNA \(All three modules\)](#) | Cisco | 2025
- [Cloud Infrastructure 2025 Certified Generative AI Professional](#) and [AI Foundation Associate](#) | Oracle | 2025
- [AWS Cloud Clubs Generative AI Camper](#) | Amazon Web Services | 2024
- Career Essentials in Cybersecurity | Microsoft and LinkedIn | 2025
- [Python Essentials 1 & 2](#) | Cisco | 2025
